# ***Personal Emergency Response Systems***

---

A Personal Emergency Response System (or PERS) is a service generally provided by a private company that helps to monitor its subscribers for falls, medical problems or other emergencies by use of a three-part system including a:

- 1) pendant, charm, necklace, belt or watch;
- 2) base station;
- 3) call center/monitoring station.

Medicare and most insurance companies typically don't pay for the equipment. New options include a Mobile Personal Emergency Response System (MPERS), which allows the subscriber to be away from the base station by using cellular technology. Many companies also offer automatic fall detection for those who don't know to press their help button or who have lost consciousness. Costs range from \$25-\$50/month.

## ***Choosing the Right Assisted Living Facility***

---

Assisted Living facilities offer housing alternatives for older adults or adults with disabilities who may need help with dressing, bathing, eating, and toileting, but do not require the intensive medical and nursing care provided in a nursing home.

### **How to Choose a Facility**

Begin by thinking about what is important to you or your loved one:

- Do you prefer to live with a lot of people or a few people?
- Do you want a private bathroom?
- Do you have Alzheimer's or dementia?

### **Narrow down your search:**

- Do you want a facility in a particular town, close to friends and family?
- Can the facility provide the level of services that you need?

### **Schedule a tour of facilities that you are interested in:**

- Visit each facility more than once, sometime unannounced.
- Visit at meal times, sample the food, and observe the quality of mealtime services.
- Observe interactions among residents and staff.
- Check to see if the facility offers social, recreational, spiritual activities.
- Talk to residents.
- Learn what staffing level they are and what training staff receive.
- Is there a waiting list?

### **Find out if the facility you are considering has received any citations:**

- Contact the Division of Quality Assurance at 800-642-6552.
- Ask the facility if they have received any citations.

## ***Do Not Resuscitate Order, and Bracelet***

---

Wisconsin passed a statute in 1996 as part of WI Act 2000 regarding “Do Not Resuscitate” (DNR) orders. A DNR order is signed by a physician to direct emergency medical service providers not to attempt cardiopulmonary resuscitation (CPR) on a patient. It is standard emergency medical practice to perform CPR on all persons found to be in cardiac or respiratory arrest.

A DNR order may be issued in certain circumstances if a patient with a qualifying medical condition requests that CPR not be done. This decision is made by the patient and their physician after discussing future treatment options. A special DNR bracelet informs first responders, EMT’s, paramedics, and emergency room personnel not to attempt CPR when a patient is wearing an approved bracelet. These statues only apply to the emergency personnel noted above, who are primarily pre-hospital and emergency department health care providers; they do not control DNR orders for inpatient hospital or other inpatient settings.

Your attending physician is the only person who may issue a DNR order for you. The order is signed only if a qualified patient requests and signs the DNR order. A person who has a DNR order is then identified by a special DNR bracelet. The bracelet is placed on the person’s wrist by the physician or someone designated to do so. Family members cannot be given bracelets to put on the person.

DNR bracelets must be honored unless the patient revokes the order, or the bracelet appears to be damaged or tampered with. If a bracelet falls off, is damaged, or is not readable, it can be replaced as long as a signed order is in your medical record.

# ***Housing and Care Options***

---

The following describes the various options available to individuals who need supportive services in their place of residence. Choice of a suitable alternative depends on a number of factors, including lifestyle preferences, the level of support needed, cost, and the options available in a particular community. Some of the options are subject to government regulation, while others are not.

## **In Home Care**

Care services can be provided to individuals in their own home or apartment. Homemaker, chore services, home delivered meals, home health care, attendant care, and transportation are some of the services that make it possible for people with long term care needs to remain in their homes. These can be arranged through public social service agencies, purchased from private agencies, or provided by family and friends. While most services are unregulated, home health agencies are licensed by the state.

## **Senior and Disabled Housing/Independent Living Apartments**

This housing is multi-unit rental housing that is specially designed for, and marketed to elderly and disabled tenants. Most offer studio and/or one bedroom apartments and some have a recreation room or other common space for social gatherings. There may be a manager available to make referrals or organize events. Tenants may individually arrange for supportive services from outside providers, as with any in-home care. No license or special regulation is required for the facility.

## **Residential Care Apartment Complex (RCAC)**

RCACs combine apartment housing with supportive, personal and nursing services. Residents have their own apartments, including full bath and kitchen facilities, and retain control over their personal space, care decisions and daily routines. Services are individually tailored to each resident's capacities and preferences and are adjusted as necessary to avoid requiring people to move if they need more help. Facilities may provide up to 28 hours of service per resident per week. RCACs are either registered or certified. Certified facilities are monitored by the state and eligible to receive Medical Assistance waiver funding, registered facilities will not.

## **Adult Family Home (AFH)**

An adult family home is a residence where one to four unrelated adults live and receive meals, supervision, and personal care. Many adult family homes, especially those with only one or two paying residents, are private homes where elderly or people with disabilities live with a foster family. Adult family homes caring for one or two unrelated adults are certified by a local managed care organization; homes caring for three or four residents are licensed and regulated by the state.

## **Community Based Residential Facility (CBRF)**

CBRFs are staffed group living arrangements that provide room, board, supervision and other supportive services to five or more unrelated residents. Typically, residents have a private or shared sleeping room and share living, dining, and bathroom space with other residents of the facility. CBRFs are intended for people who cannot live independently but are neither acutely ill nor need extensive amounts of nursing care. Facilities vary in size from five residents to over 100. Some are houses, others are facilities. Some serve a frail elderly population; others serve people with disabilities, people with Alzheimer's disease, or mixed group of residents. All CBRFs are licensed by the state.

## **Nursing Home**

A nursing home is a health care facility which provides room, board, and 24 hour care. Residents may be admitted for a short-term stays or for long-term care for chronic conditions. Nursing homes are licensed by the state. Most are also certified for Medicare and Medicaid, which provide public funds to cover the cost of care for eligible residents.

## ***Living Will/Power of Attorney***

---

As a competent adult, you have the right to make your own health care decisions. However, you could become incapacitated at any time by an accident, illness or debilitating condition that could lead to your loss of ability to express your wishes about medical treatment. For this reason, it is important for you to plan for future health care decisions. An advance directive is a legal document that allows you to make your health care desires and preferences known.

An advance directive includes written instructions recognized under state law by which you communicate your health care preferences. There are many different terms used to describe advance directives.

The written advance directives recognized by Wisconsin law are:

- Power of Attorney for Health Care (POAHC)
- Declaration to Physicians (known in Wisconsin as Living Will)

Completing either of these documents is voluntary. They are “valid” once they have been completed, properly witnessed and signed. It is important to know that you continue to make your own health care decisions as long as you are able. A Power of Attorney for Health Care becomes effective when two physicians, or one physician and one psychologist, personally examine you and sign a certificate that you are “incapacitated” to make health care decisions. A Living Will becomes effective when you are either in a “persistent vegetative state” or have a terminal illness with death imminent. Two physicians must certify that one of these conditions exists.

## ***When Should a Person Quit Driving?***

---

There is no specific age at which a person can be considered too old to drive, as long as he or she remains healthy and if the declines that take place in the senses and other capabilities are normal. However, because our driver's license carries the greatest responsibility that each of us will ever have, we need to ask ourselves some questions regardless of age.

- Do I have memory problems?
- Am I sometimes afraid to drive?
- Do I feel aggressive when I drive?
- Do I have trouble with my vision? Especially at night?
- Do I have trouble hearing?
- Do I take medication that causes drowsiness, or stimulates?
- Do others honk their horn at me for no reason?
- Do I have difficulty with heavy interstate traffic?
- How can I improve my driving skills?
